

Create an XY line chart showing monthly sales revenue for a small business from January to December. The X-axis should represent the months, and the Y-axis should represent revenue in USD. Use the following data: Jan: 12000, Feb: 14500, Mar: 13800, Apr: 16200, May: 17500, Jun: 19100, Jul: 20500, Aug: 19800, Sep: 21400, Oct: 22800, Nov: 24500, Dec: 26700. Include axis labels, gridlines, and a chart title.

xychart-beta

title "Monthly Sales Revenue 2024"

x-axis [Jan, Feb, Mar, Apr, May, Jun, Jul, Aug, Sep, Oct, Nov, Dec]

y-axis "Revenue (USD)" 0 --> 30000

line [12000, 14500, 13800, 16200, 17500, 19100, 20500, 19800, 21400, 22800, 24500, 26700]

Generate an XY line chart comparing the average Mathematics and Science scores of students across six semesters. The X-axis should display Semester 1 through Semester 6, and the Y-axis should represent average marks out of 100. Plot two separate lines with a legend. Use the following data: Mathematics: 72, 75, 78, 81, 84, 88 Science: 70, 73, 77, 79, 83, 86 Add markers, a legend, axis labels, and a descriptive title.

xychart-beta

title "Math vs Science Scores by Semester"

x-axis [Semester 1, Semester 2, Semester 3, Semester 4, Semester 5, Semester 6]

y-axis "Average Marks (out of 100)" 0 --> 100

line [72, 75, 78, 81, 84, 88] "Mathematics"

line [70, 73, 77, 79, 83, 86] "Science"

Create a multi-series XY chart analyzing the performance of a company's stock over one calendar year. The X-axis should represent trading months from January to December. Plot four series: - Monthly closing stock price (USD) - 30-day moving average - Trading volume (millions of shares) on a secondary Y-axis - Relative Strength Index (RSI) values ranging from 0 to 100 on a third scale or clearly distinguished axis Highlight the highest stock price, lowest stock price, months where RSI exceeds 70 (overbought) or falls below 30 (oversold), and display trend lines for both stock price and moving average. Include a legend, clearly labeled axes, gridlines, annotations for major events, and an overall descriptive title.

title "Stock Performance Analysis 2024"

y-axis "Price (USD) / RSI" 0 --> 200

line [108, 110, 112, 114, 118, 120, 122, 124, 126, 128, 130, 132]

bar [120, 135, 110, 145, 160, 155, 170, 185, 180, 195, 210, 205]

```
annotate "Peak: $142" 11 142
```

```
annotate "Low: $105" 0 105
annotate "Overbought" 7 130
annotate "Oversold" 2 108
annotate "Q3 Rally" 6 125
grid true
```
